

Krown Wash is designed to remove oils, while still maintaining the easy rinsing shine of a vehicle wash detergent.

Features & Benefits

Designed to Remove Oils

Krown Wash is specifically formulated to quickly and safely remove oils from a vehicles surface.

Environmentally Friendly

Krown Wash leaves behind a clean, shiny finish without the use of harsh chemicals and is safe on any surface.

Foam Stability

When oil mixes into a wash bucket it kills the foam of the soap making it necessary to change the water frequently. With Krown wash the foam lasts even in the presence of oils much longer than the average wash soap.

*Available quantities: 4L, 20L, 205L, 1000L

*All Krown products are NPE/APE free.

** Test this product in an inconspicuous area first.
